

## Your COVID-19 test result

# POSITIVE

A positive result for this test means that SARS-CoV-2 RNA (the cause of COVID-19) was detected in the collection sample.

### What does it mean to have a **positive** test result?

If you have a positive test result, it is likely you have COVID-19. Therefore, it is also likely that you may be placed in isolation to avoid spreading the virus to others. There is a very small chance that this test can give a positive result that is wrong (a false positive result). Most cases can be cared for at home. Stay home and limit contact with other until:

You have been fever-free for at least 3 days without using medicine that reduces fever **AND** your symptoms have improved **AND** at least 10 days have passed since your symptoms first appeared.

- Do not go to the hospital to seek care unless you have a medical emergency
- Do not go to work, notify your employer of your positive test result
- Contact your primary care provider and inform them of your positive COVID-19 test result
- Continue to monitor your symptoms at home and seek medical attention if symptoms worsen

### Test information

**Patient's name**

Charmaine Luceniada

**Collection date**

December 31, 2020 at 12:50 PM ET

**Patient's date of birth**

October 21, 1989

**Collection location**

9 BERLIN ROAD, CLEMENTON, NJ 08021

**Test type**

SARS-COV-2 RNA, QL, RT PCR (COVID-19)

**Provider**

VELEVA ANI

### MinuteClinic contact information

**Customer Service:** (886) 389-2727

## Your COVID-19 test result

# POSITIVE

A positive result for this test means that SARS-CoV-2 RNA (the cause of COVID-19) was detected in the collection sample.

## Legal Disclaimer

A Detected result is considered a positive test result for COVID-19. This indicates that RNA from SARS-CoV-2 (formerly 2019-nCoV) was detected, and the patient is infected with the virus and presumed to be contagious. If requested by public health authority, specimen will be sent for additional testing.

Please review the "Fact Sheets" and FDA authorized labeling available for health care providers and patients using the following websites:

<https://www.questdiagnostics.com/home/Covid-19/HCP/NAAT/fact-sheet2>

<https://www.questdiagnostics.com/home/Covid-19/Patients/NAAT/fact-sheet2>

This test has been authorized by the FDA under an Emergency Use Authorization (EUA) for use by authorized laboratories.

Due to the current public health emergency, Quest Diagnostics is receiving a high volume of samples from a wide variety of swabs and media for COVID-19 testing. In order to serve patients during this public health crisis, samples from appropriate clinical sources are being tested. Negative test results derived from specimens received in non-commercially manufactured viral collection and transport media, or in media and sample collection kits not yet authorized by FDA for COVID-19 testing should be cautiously evaluated and the patient potentially subjected to extra precautions such as additional clinical monitoring, including collection of an additional specimen.

Methodology: Nucleic Acid Amplification Test (NAAT) includes RT-PCR or TMA

Additional information about COVID-19 can be found at the Quest Diagnostics website: [www.QuestDiagnostics.com/Covid19](http://www.QuestDiagnostics.com/Covid19).
